

Overview

This records player input/camera movement and plays it back. Some player actions such as vehicle movement are not supported.

You need to start and record in game mode (Press **Ctrl + G** in the Editor after the level has been fully loaded, or load the level in Pure Game Mode).

After each playback you get a log printout that looks like the following (in the console and also in the file timedemo.log in the level directory for the level used):

```
TimeDemo Run 131 Finished.
Play Time: 3.96s, Average FPS: 50.48
Min FPS: 0.63 at frame 117, Max FPS: 69.84 at frame 189
Average Tri/Sec: 14037316, Tri/Frame: 278071
Recorded/Played Tris ratio: 0.99
```

Recording Controls

Command	Keystroke	Console Commands
Start Recording	Ctrl + PrintScreen	record
End Recording	Ctrl + Break	stoprecording
Start Playback	Shift + PrintScreen	demo
Stop Playback	Ctrl + Break	stopdemo

Related Console Variables
